

# 2018-19 Moorhead Factory Pulp & Tailings Information

## Tailings

Each summer, the Moorhead Factory tailings products go out for bid for the following year. If you would like to be included on the bid list, please call the Moorhead factory contact as posted below.

## Pulp Byproducts

All dry and wet pulp products will be listed through the notification system. If you would like to be notified of dry or wet pulp byproducts, please sign the **Byproduct Sales Agreement** linked on the website and return to the address posted.

The text (or email) notification will provide a link to reserve the byproduct and indicate the price, if applicable. Your selection is your agreement to the posted price. Once reserved, the byproduct **must be picked up within 24 hours** from the Moorhead factory. If mechanical or weather-related difficulties arise, please notify the factory contact immediately. Customers who do not pick up their reserved product daily will no longer be allowed to reserve or receive product.

## Factory Pick-up

To pick up the byproducts, use Gate 6 on the north side of the factory grounds (on County Hwy 18). Stop at the guardhouse for loading directives. The truck will be weighed in and out of the factory grounds. Upon leaving, the guardhouse will administer a scale ticket for invoicing and provide a copy for your records.

## Loading Hours

Loading hours are 24 hours/day for 7 days a week. Product is generally available during beet slice, typically from mid-August through early May.

## Contact Information

If you have any questions or comments, please contact the Moorhead Factory Office Coordinator at (218) 291-5414.
