

Moorhead Factory VersaLime Information

Production & Mined Versalime

The Moorhead Factory will have approximately 80,000 tons of production VersaLime available for pickup. This lime is from the current campaign and will be loaded prior to mined VersaLime. Once production VersaLime has been loaded and removed, the factory will start to mine VersaLime from a closed section of the landfill. This lime may have higher moisture, and it may contain rocks.

Loading Fee

The loading fee is \$50.00 per load. This fee will be charged for all VersaLime - production and mined lime. Trucks can scale in and out, but the \$50.00 loading fee will apply to all loads, regardless of the scale ticket weight.

Paperwork

Customers must fill out required paperwork prior to picking up lime for a particular site. Review and/or return the following documents:

- Lime Removal Agreement. Each year, customers must review, sign and return this agreement.
- Site Suitability Checklist. Customers must complete and return one form for every site where VersaLime is going to be applied.
- **American Crystal Sugar Company reserves the right to inspect sites to ensure suitability requirements are being adhered to.**
 - Fax : 218.236.4702
 - Email: kuhlig@crystalsugar.com or bhalvors@crystalsugar.com.

Loading Hours

Typical loading hours are from 8 AM to 5 PM Monday-Friday, March 15th through around November 1st.

VersaLime Load Out Messaging

Customers who wish to receive information on VersaLime loading can sign up for text messaging and/or email notifications, section provided in the registration paperwork. Notices will go out when there is a change in loading time.

The First Load

Prior to picking up your first load, please complete and return your paperwork. You will then be sent a card with a number that corresponds to a specific field. Once you receive your number(s) you are free to pick up loads. Trucks can proceed directly to the loading site (east of Hwy 75). Drivers will need to show their assigned number card to the loader operator prior to receiving each load. Please make sure you show the number that corresponds to the field you plan to take the load to.
