

Dear Warren Delivery Site Growers,

July 25, 2025

Here is the 2025 Truck Haul information for Warren.

Warren will prepile during the 4th shift rotation this year. This is set for September 2-3 and September 8-10th. As always, this is subject to change. Warren is under the Crookston Harvest District, so look at the website for updates and changes.

This year, there will be **2 groups** for prepiling sugarbeets into Warren. The enclosed prepile sheet will tell you which group you are in for delivery.

**Group 1** is projected to start on **Tuesday, September 2** at 8:00 a.m. This group will be for growers hauling 40% or more of their planted acres into Warren. You will be able to haul during September 2,3, 8, 9, 10.

**Group 2** will start on **Monday, September 8**. This group is for those that haul less than 40% of their planted acres into Warren. You will be able to haul Sept. 8,9,10.

Prepile quota, currently is set at **5.6 tons/acre**.

Prepile truck allowance will be based on 70% of your total trucks per your shift as either a 12 or 24 hour grower. There will be a minimum of 2 trucks per grower for the prepile timeframe. The enclosed Warren 2025 Prepile sheet shows the number of trucks you will be allowed during prepile in the right column. Trucks will be counted so please use your allotted number of trucks for efficient prepile.

The idea of 70% truck allotment for prepile only is to eliminate long lines that go onto Highway 75 that create a hazardous situation and improve turnaround time at the site.

The Prepile page also shows your prepile quota for the Warren piling site. It is your requirement to deliver this quota since your acres have been contracted to this site. If you want someone else to haul your prepile quota- please let Bob Joerger know this information as soon as you know, and he will assist with other possible arrangements.

The "scale out" slips given to drivers on the "out" scale do show your accumulating tons on the bottom, so you know your accumulated quota after every load delivered. Keep the rotobeater close to lifter to meet your quota. **Rotobeating beyond your quota does not guarantee you will be able to deliver those tons.**

\*\*\* Warren has a 2 truck minimum for a 12 hour grower. The 2 truck, 12 hr. minimum grower, will have a 12 hour schedule that rotates each year. If a 2 truck minimum grower wants to be a 24 hr grower- they would only get 1 – 24 hour truck sticker. \*\*\*

The truck allocation is shown based on past 12 & 24 hour grower information. Please check your other sites to make sure that shifts to other stations match up on the same times and designations. If there is any discrepancy, please let Bob Joerger know asap for correction.

**\*\* Reminder:** trucks will need to go straight forward to get tare dirt after dumping beets-most drivers are doing this already. The option of backing up, towards the piler, under the tare dirt conveyor will **no longer** be accepted due to safety concerns of the ground crew and future plans for piler automation. We will continue to train and emphasize tare dirt placement to the back of the truck box.

Truck turnaround time is important to all of us. Under truck specs, pls check your trucks to do:

**Hoist Guidelines:** • 30 seconds hoist downtime tandems and triples • 45 seconds hoist downtime semis

Total Unloading Time: • Tandems - 2.25 minutes • Tri-axes - 2.75 minutes • Semis - 3.50 minutes

Check the dump valves on the trucks and have drivers be aware how to operate this function in lowering boxes.

A recommendation to keep faster turnaround times in Warren:

1. Have trucks be closer to the end dumps while waiting to go onto the piler when there is no need for trucks back through the end dumps.
2. If your farm has a relatively large number of trucks vs. other growers- check with other larger growers to see if there's opportunities to be at another site on the same day(s)? Long truck lines increase truck turnaround times and cost you more money.

A driver training video is still available on the ACSC website to train and refresh drivers.

**IMPORTANT:** \*\*\*\*Be sure to have your stickers on your trucks before stockpile starts. \*\*\*\*

If there are any questions- you may call any of the truck haul committee members or Agriculturist Bob Joerger as shown on the bottom of the sheet.

If you see any discrepancies or errors in the information -please promptly let me know.

Thank you for your assistance in working together to make the upcoming harvest as smooth as possible!

Sincerely,

*Warren Truck Haul Committee &*

*Bob Joerger- ACSC Sr. Agriculturist(701-330-6765), [bjoerger@crystalsugar.com](mailto:bjoerger@crystalsugar.com)*
