

2/17/2026

Dear Lime Customer,

We hope you had a great winter. As spring approaches, we want to provide a reminder about the updates made to the VersaLime program. While these changes are not new, we want to ensure all customers are aligned and aware of the current requirements and processes as we head into another application season.

First, here is an update on the status of our lime landfills. We expect our landfills to open in late March or early April. We will send a message through our mass text system to alert you as to when the landfills open and loading can begin. It is possible that each factory landfill will open at a different time, which is at the discretion of the local environmental staff and factory managers.

Lime paperwork for 2026 is now available at [Crystalsugar.com](https://crystalsugar.com) under Agri-Products - VersaLime section or through this link: [VersaLime | American Crystal Sugar Company](#). Make sure to click on the red button that says VersaLime & Ag-Lime Agreement Forms to find the forms. We will not be directly emailing or mailing paperwork to customers.

There are several documents required to load lime. These should be completed at least 10 days before you expect to load lime. A Site Suitability Checklist and Lime Removal Agreement are required. You should also review the updated Terms and Conditions found here: [terms-conditions-lime-removal.pdf](#). We only need one Lime Removal Agreement per customer. However, each lime application site needs to have its' own Site Suitability Checklist form filled out. Make sure to use the 2026 forms. Older versions are not acceptable.

In addition, please remember that soil testing requirements must be followed for all lime application sites. Ensuring soil tests are current and meet program standards helps confirm that lime use is appropriate and complies with environmental guidelines.

If you have any questions or need to submit application documents, please direct them to: Byproducts@crystalsugar.com for the fastest response. You can also call the Byproducts Hotline: 218-236-4320 or refer to the local resources for each factory provided at VersaLime webpage.

We look forward to working with you this upcoming year and appreciate your business!

Sincerely,

Byproducts Team
